## Retrogression, Combustion, and Chara Karaka Explanation in Astrology

These are three important concepts in Vedic astrology that influence a planet's strength, function, and results in a birth chart. Let's break them down in detail:

---

### 1. Retrogression (Vakri Graha)

#### What is Retrogression?

- A planet is called **retrograde (Vakri)** when it appears to move **backward in the sky** from the Earth's perspective.
- Retrograde planets have **intensified energy**, meaning they can give **unexpected, strong, or delayed results**.
- Retrogression often makes a planet's effects **karmic**—bringing back unfinished lessons from past lives.

#### Effects of Retrograde Planets in a Birth Chart

Planet	Effects of Retrogression
☐ <b>Sun</b> (Rarely retrograde)	No direct impact since the Sun never retrogrades.
☐ <b>Moon</b> (Never retrograde)	No retrograde effect.
☐ <b>Mars (Mangala)</b>	Increases aggression, impulsiveness, and energy but may create internal conflict.
☐ <b>Mercury (Budha)</b>	May cause <b>communication issues, overthinking, or delays in decision-making</b> .
☐ <b>Jupiter (Guru)</b>	Brings <b>deep wisdom</b> , spiritual growth, but <b>delays in expansion</b> (marriage, children, finances).
☐ <b>Venus (Shukra)</b>	<b>Struggles in relationships, self-worth issues, and delays in love/marriage</b> .
☐ <b>Saturn (Shani)</b>	<b>Delays, karma repayment, and long-term struggles</b> —but later brings strong rewards.

#### How to Interpret Retrograde Planets?

- A retrograde planet functions differently from its normal behavior.
- If a **benefic planet (Jupiter, Venus)** is retrograde, it may delay good results but later gives **stronger blessings**.
- If a **malefic planet (Mars, Saturn, Rahu, Ketu)** is retrograde, it can **increase its negative effects** and cause struggles before success.

#### 📌 Example:

- **Saturn Retrograde in the 7th House** → Delays marriage but gives a mature and responsible partner later in life.
- **Jupiter Retrograde in the 10th House** → May delay career success but gives wisdom and great opportunities later.

## 2. Combustion (Astangatva)

### What is Combustion?

- A planet is **combusted (Astangatva)** when it comes **too close to the Sun** (within a certain number of degrees).
- The Sun's powerful energy **burns the qualities** of the combust planet, making it **weaker or hidden**.
- This can cause **loss of confidence, struggles, or difficulty in expressing the planet's qualities**.

### Degrees of Combustion for Each Planet

Planet	Degrees of Combustion (from the Sun)
☐ Mars	Within <b>17 degrees</b>
☐ Mercury	Within <b>12 degrees (Regular), 14 degrees (Retrograde)</b>
☐ Jupiter	Within <b>11 degrees</b>
☐ Venus	Within <b>10 degrees</b>
☐ Saturn	Within <b>15 degrees</b>

### Effects of Combustion on Planets

Planet	Effects of Combustion
☐ Mars (Combust)	Weakens courage, makes a person short-tempered but <b>unable to express anger openly</b> .
☐ Mercury (Combust)	Communication issues, difficulty in making decisions, overthinking.

Planet	Effects of Combustion
☐ Jupiter (Combust)	Loss of wisdom, delays in marriage/children, weak guru guidance.
☐ Venus (Combust)	Relationship struggles, attraction issues, difficulty in expressing love.

- **Worship the Sun (Surya Namaskar, Aditya Hridayam Stotra).**
